## DETAILED ACTION

Claims 1-7 are pending in this application.

### ***Election/Restrictions***

Due to the widely divergent meanings of variables R1 and R2, a precise listing of inventive groups cannot be made. The following groups are exemplary:

Group I, claims 1-4, drawn to compounds and compositions of formula I, wherein R1 represents aryl lower alkyl group, said aryl group is substituted with one or more groups selected from the group consisting of a halogen atom or an aryl group, and R2 represents a lower alkyl group which may be substituted by a hydrogen atom, a lower alkyl group, or a lower alkenyl group, classified in class 548 and subclass 494.

Group II, claim 5, drawn to a process of producing the compound of claim 1 wherein R1 represents an aryl lower alkyl group, said aryl group is substituted with one or more groups selected from the group consisting of a lower cycloalkoxy-lower alkyl group, or an aryloxy lower alkyl group, and R2 represents a lower alkyl group which may be substituted by an aryl group, classified in class 548 and subclass 465+.

Group III, claim 6, drawn to drawn to a process of producing the compound of claim 1, wherein R1 represents an aryl lower alkyl group, said aryl group is substituted with one or more aryl lower alkoxy groups, and R2 represents an aryl group which may be substituted by a hydrogen atom, a lower alkyl group, or a lower alkenyl group, classified in class 548 and subclass 494.

Group IV, claim 7, drawn to a process of producing the compound of claim 1 wherein R1 represents an aryl lower alkyl group, said aryl group is substituted with one

or more lower alkoxy groups, and R2 represents an aryl group which may be substituted by an aryl group, classified in class 548 and subclass 494.

In accordance with 37 CFR 1.499, Applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted. Again, this list is not exhaustive. It would be impossible to formulate a complete listing of groups under the time constraints, due to the sheer volume of subject matter instantly claimed. Therefore, Applicant may choose to elect a single invention by identifying another specific embodiment not listed in the exemplary groups of the invention and examiner will endeavor to group the same.

A request for an oral election to the above restriction requirement was made to Mr. Jeffrey Hsi by telephone on 6-4-03, but did not result in an election being made.

The claims herein lack unity of invention under PCT Rule 13.1 and 13.2 since the compounds defined in the claims lack a significant structural element qualifying as the special technical feature that defines a contribution over the prior art. The compounds claimed contain variables R1 and R2 and the compound does not define a contribution over the art. The variables are broadly defined, and when taken as a whole result in vastly different compounds. Accordingly, unity of invention is considered to be lacking a restriction of the invention in accordance with the rules of unity of invention is considered to be proper. Additionally, the vastness of the claimed subject matter and the complications in understanding the claimed subject matter imposes a burden on any examination of the claimed subject matter.
